Bulk Product Upload — Primary Image Error Report

31 August 2026 • Clickable URL Edition

1. Summary

The import UI reports **50 failed products**. The supplied error log contains repeated/garbled lines, so this report lists only uniquely reconstructable rows and does not invent missing row mappings. All reported failures are related to the **Primary Image URL** field.

Error type	Unique rows	Reason
Timeout	23	Remote image did not download within 20 seconds.
HTML instead of image	18	ibb.co share/page URLs return text/html.
404 Not Found	2	Image resource does not exist at supplied URL.
Invalid URL	1	Repeated template/header row was processed.
HTTP 200 but rejected	1	Request succeeded but importer rejected the response as an image.
Total uniquely reconstructed	45	Based on the supplied log.
UI reported failures	50	Official UI total; 5 entries cannot be uniquely mapped from the duplicated/OCR log.

Timeout

These URLs may be valid images, but the server could not download them within 20 seconds.

Row	Product / Brand	Primary Image URL (CLICK)	Reason
56	Daawat Biryani Special Basmati / Daawat	https://i.postimg.cc/sx6Svb6c/c30bdc6f-d797-4eff-8405-496bcab57aa2.png	Remote image download exceeded the current 20-second (20,000 ms) timeout.

4. Recommended Fix

Use direct image-file URLs in the Excel, not image-hosting share pages such as ibb.co. Replace 404 links. In the importer, skip template/header rows, enforce HTTP status + image/* Content-Type validation, and report the underlying download error (timeout/404/HTML/etc.) instead of a generic upload failure.

Note: This report keeps the UI-reported total of 50 failures but lists only the 45 unique rows that can be reliably reconstructed from the duplicated/garbled error log provided.
